

AS-1(Active)

The TESLA AS-1 is an active single strat type humbucker, it features Alnico V pole piece magnets and plain enamel copper wire. The AS-1 we designed as a medium high powered pickup that produces a clean, warm, and smooth vintage single coil sound that fits most playing styles. Designed to fit and work in all three playing positions, neck, middle and bridge.

Combine the AS-1 with the AS-2, use the AS-1 in the bridge position and the AS-2 in the middle and neck positions for incredible variations of sounds!

Mount them on your original pickguard, forget any modifications to your body, these pickups will work for you by giving you the output, the sounds, the cleanliness, the noise cancelling, without the slightest of problems.

Our newly designed super efficient preamp features a power consumption of only 90 micro amperes.

That means your 9 volt battery will last approximately 6,000 hours, which translates to that on a guitar that is using three AS-1 pickups, you play 5 hours a day, the battery will last one entire year!

ADDITIONAL PRODUCT INFORMATION

AS-1	
Specification	
Resonant Peak	4.8 kHz
Spacing	52 mm
Output level	Mid-High
Type	Dual Coil
Copper Wire	Plain Enamel
Magnet	Alnico 5(Polepieces)
Battery Life	6000 Hours
