

VR-Nitro

So you like to play loud, hard, and fast?

The VR-NITRO offers the player the most even tonal possibilities with a blistering output. Missing the punch in the midrange, here it is! These are surely the pickups you are after.

The VR-Nitro is carefully made with heavy Formvar copper wire and bar type Alnico 5 magnets. The coils are wax potted for stabilization to insure the complete, clean reproduction of sound.

Four wire leads allow for endless tonal possibilities.
